A WORD FROM THE PUBLISHER

WITH the completion of Volume one of the ANNALS OF MEDICAL HISTORY, the publisher desires to express his appreciation of the coöperation received from members of the profession, whose watch-word is "sacrifice," and who, in these times of stress have added new lustre to their history by maintaining the best health record in the history of the armies of the world.

The fact that the first number of the Annals appeared synchronously with the entrance of the United States into the war was due entirely to the hard work and enthusiasm of the Editor, Captain Francis R. Packard. His last efforts before leaving for duty with Base Hospital No. 16 in France were devoted to the preparation of the first number. This appeared after he had entered upon the arduous duties which he is still carrying on at the front. To suggestions that material would not be forthcoming and that subscriptions would lag on account of the war, Dr. Packard lent a deaf ear. The four numbers now published are submitted as a vindication of his judgment.

Lieutenant Colonel Garrison edited the second number. Of his kindly help and suggestions the publisher has had many opportunities to avail himself and too much credit and thanks cannot be given him.

Beginning with the third number, Dr. Charles L. Dana of New York City assumed editorial charge of the Annals, pending the return of Dr. Packard. For Dr. Dana's willingness to add to his duties and responsibilities at this time, the publisher extends his thanks and bespeaks those of the subscribers.

To the Associate Editors thanks are due for their helpfulness and encouragement and special mention must be made of Sir William Osler, who has found time not only to write articles, but to procure them from others.

Captain Charles Singer and his wife have rendered assistance that we feel will be appreciated not only by the readers of the ANNALS OF MEDICAL HISTORY but by all medical men of both America and England. Their contributions will serve to cement further the bond of friendship in the profession of the two countries.

To all who have unselfishly contributed their papers to the first volume of the Annals and made possible its completion, and to those whose subscriptions have given the encouragement necessary for successfully carrying on the Annals, the publisher extends his heartiest thanks. The courtesy and patience of subscribers will not be forgotten, for despite delays in publication, they have had nothing but encouraging words for the Annals.

With the return of peace, it is hoped that the usefulness of the publication will be demonstrated in such a fashion that the workers whose efforts have been so generously and unostentatiously given will be more than recompensed.

Number 1 of Volume II is already in hand and for its future, the publisher sol­licits the continuation of that collaboration which has made Volume I possible.

PAUL B. HOEBER,
Publisher.

New York,
November, Nineteen Hundred Eighteen.
INDEX TO VOLUME I

Academy of Medicine, the old Paris, Jetons of, in the numismatic collection in the Army Medical Museum at Washington, D. C., Albert Allemann, 155.
